Note	From
Reviewer Comments For author and editor No. Review 1. Some abbreviations have not been explained. It should be written in full and then can be abbreviated. (Ex. MC, PCU) 2. There is inaccurate reference writing. Example: Izumi Okura 2006 or 2003 3 The number of references is only 12. Based on the requirement, the minimum number of references is 15. (See the author guidelines and template) 4. It is necessary to check the order of the table numbers. Example. The author writes Table 1 twice. 5. Some notations have not been explained in table 1 (H, Y, K, S & T). And it is also necessary to explain the calculation basis for the average value other than the maximum and minimum values. 6. It is necessary to check again for table 7. Some words writing not in English. In addition, it is necessary to explain the basis for calculating the percentage value. 7 It is necessary to include the source for articles citing from another reference. Example: Table 8, paragraph "Veteran street....." etc. 8. The sentence "Based on the table above .." should refer directly to the table number.	ci-tech 2022-05-10 02:54 AM
