

## **CHAPTER V**

## **COVER**

## **5.1 Conclusion**

The design of the illustrated book on the history of Green Nord and the struggle of Persebaya was carried out in response to the lack of understanding of supporters aged 20-25 years about the role of Green Nord in the process of resolving Persebaya's dualism. Based on the results of questionnaires, interviews, observations, and data analysis, it was found that the need for visual literacy media is very high among young supporters. Therefore, illustration books are chosen as the most effective medium to convey historical information in a comprehensive, interesting, and easy-to-understand manner.

Through a design process that includes primary and secondary data processing, the formulation of visual and narrative concepts, and design validation, an illustrated book is produced that contains the history of the founding of Green Nord, a series of actions during the period of dualism, and the values of - The values of antiracism and creativity that are the identity of the group. This design is expected to be able to increase historical understanding, strengthen the positive character of supporters, and support efforts to reduce the culture of racism in the Indonesian football environment.

## **5.2 Suggestion**

In the development of this illustration book, it is suggested that in the next stage a more complete and detailed chronology of the year be added to clarify the sequence of important events in the journey of Green Nord and the period of Persebaya dualism. The inclusion of year details in each historical moment will help readers understand the flow in a more concise and systematic way. In addition, this illustration book also needs to strengthen the mention of the names of characters or figures involved in the narrative, both from the supporters, action movers, and figures who have a direct role in the dynamics of Persebaya's struggle. The addition of a visual timeline and a clearer and more structured arrangement of characters will increase the informative value of the book, make it easier for readers to follow the storyline, and enrich the quality of historical documentation in this work.
